The fabulously decorated class rooms reset their moods and made them cheerful. The presence of other students comforted them and they opened up to speak, laugh and interact with their teachers. Well that was just the beginning but the process of sharpening their skills and moulding them into becoming independent, self-surviving, full-fledged students is going ahead in full swing!

THE MAKING OF THE STUDENT COUNCIL -

Ted Ward says "Leadership is a serving relationship that has the effect of facilitating human development." In our school, we tend to develop leadership qualities among our students by giving them responsibilities as leaders, first group wise, house wise, class wise and then right up to the entire school. The date for the election was announced in the assembly and the prospective candidates for the various posts went about campaigning. The Nominees began their campaigning in earnest with passionate promises to keep the Regency flag flying high.

REGENCY GOES TO FIRST EVER COMPUTERISED POLLING!!!

Elections at Regency were historic this year around. Thanks to our computer wizard **Shreyas .S.R.**, of grade 10 A, the elections at Regency were completely computerized, paperless and quick. He created a Java programme which was loaded into our audio visual system in every class and students keyed in their votes for the candidate of their choice.

The programme ensured that each student voted only once and at the end of the voting process, all votes were automatically totalled and results instantaneously visible to the administrator. His effort saved paperwork, time and effort and enthused all of us no end.

The list of the winners who made it to the council are as follows
